Budgeted Amount: **Rs 1500/-**	Total expenditure: **Rs 1500/-**	Balance: **Rs 0/-**

Brief Report

The Department of Botany at St. Mary's College, Thrissur, organized a hands-on workshop titled "Green Spaces" for students on March 24, 2026. The session focused on indoor plant making, specifically utilizing the versatile Money Plant (*Epipremnum aureum*).

The workshop aimed to promote environmental consciousness and provide students with practical horticultural skills. Expert trainers demonstrated various propagation techniques, including water-based rooting and soil potting. Students participated actively, learning about the ideal light conditions, watering schedules, and the air-purifying benefits of keeping indoor plants in hostel rooms and study areas.

The event concluded with a distribution of saplings, encouraging a "Green Campus" initiative. This initiative not only enhanced the students' technical knowledge but also provided a therapeutic break from their academic routine, fostering a deeper connection with nature.

Expenditure Statement

Item	Expenditure	Remarks
