Brief Report

The event, as highlighted to promote sustainable and eco-friendly living by encouraging participants to create natural cleaning products using easily available ingredients. The workshop provided hands-on training in making essential household products such as soap, soap powder, handwash, and detergents. Students actively participated in the preparation process, learning about the chemical-free alternatives to commercial cleaning agents and the benefits they offer to health and the environment. Through this initiative, students gained valuable knowledge in sustainable practices while enhancing their ability to innovate with natural materials. In addition to gaining practical knowledge, students took the initiative further by packaging and selling the products they created, showcasing their entrepreneurial skills and promoting the benefits of natural alternatives to chemical - based Cleansers. session also encouraged a do-it-yourself (DIY) approach, making eco-conscious living accessible and impactful. Overall, the program successfully empowered students with the skills and motivation to adopt greener lifestyles, aligning with the broader goals of environmental protection and community well-being.
